## Android OS Built-in Apps

### FEATURES:

- Android 7.0 pre-installed
- True plug and play
- Powerful whiteboarding, web browser
- Cloud storage services (Google Drive, OneDrive) and wireless screen sharing pre-installed on your display 'out of the box'
- Teaching applications and tools ready to go
- No software to download

## RevNote

### WHITEBOARDING

- RevNote is a powerful interactive whiteboarding software
- The software includes whiteboarding tools (Multitouch, Gesture Control, Handwriting/shape recognition), teaching templates and more tools for a variety of subjects, lesson planning and the ability to add annotations over top of documents
- Easily share and save files with Google Drive and OneDrive integrations
- RevNote desktop software is available for Windows 7 and above

## RevConnect

### CONNECT MOBILE AND TABLET DEVICES

- RevConnect gives you the ability to connect mobile devices to your RevTouch display
- PowerPoint or RevNote presentations can also be managed from your mobile device, two-way interactive Screen Control from your device or PC
- Available for Windows 7 and above and OSX

## ScreenShare Pro

### WIRELESS SHARING

- Wirelessly connect any device to the display to share audio and video. Full mirroring capabilities for devices using Android, iOS, OSX and Windows operating systems
- Simple and secure PIN code connectivity permits you to connect multiple devices to your display, all at the same time
- ScreenShare Pro is pre-installed on every RevTouch display 'out of the box', and includes the license

## RevCapture

### RECORD CONTENT

- Record, edit and share what you do on your RevTouch display with RevCapture. Ideal for both lesson capture and lesson preparation. Various education templates are included
- Easily record your lesson and voice via the app
- Record your presentation or training session for future playback or posting elsewhere
- RevCapture includes a full editing suite
- RevCapture desktop software is available for Windows 7 and above

## RevVisualizer

### DIGITIZE ANYTHING

- Instantly integrate your USB document camera with your RevTouch display, or simply use a USB Camera to digitize your content
- Once your content is up on the display you can annotate on the image and share
- RevVisualizer comes pre-installed on all RevTouch displays

## RevRemote

### REMOTE MANAGE YOUR DISPLAYS

- RevRemote gives you the ability to manage all your RevTouch Touch Displays on the same network
- IT managers can conduct simple remote troubleshooting and easy office/school board/district messaging and communications
- RevRemote desktop software is available for Windows 7 and above
